

TYPE 7 IMMERSION PLATE

The **TYPE 7** immersion plate is designed for steam service. The plate is equipped with a larger steam inlet nozzle feeding the open portion of the plate where the steam or vapor is condensed, while the bottom portion of the plate is configured with a condensate discharge baffle providing a control path for driving out the condensate.

Optional plate hangers are available for easy installation.

Standard Specifications:

- Surface Type: Double Embossed
- Sheet Thickness: 14ga. (0.075")
- MOC: 304 Stainless Steel
- Pressure Rating: 150 PSIG / 400°F

NOZZLE SCHEDULE	
INLET (UPPER)	OUTLET (LOWER)
1" NPT	3/4" NPT
1 1/2" NPT	3/4" NPT
2" NPT	1" NPT

Standard nozzles are Male NPT
