- Plate Coil
- "U" Nest
- Coil
- Integral Fin
- Wound Fin
- Plate Fin
- Serpentine
- Surface Enhanced

Industries/ Applications Served:

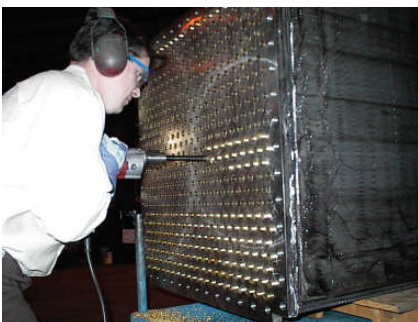

- Compressor After & Inner Coolers
- Electrical Utilities
- Heat Treat
- Chemical
- Textile
- Welding Plasma
- Automotive Manufacturing
- Steel Manufacturing
- Hydraulics
- Paper and Pulp

How we Clean:

- Acid Tank immersion and high velocity circulation
- Caustic tank immersion/circulation
- Steam Jet
- High pressure water
- Water flush drilling

How we Repair/Rebuild

- Specialized tools to remove tube bundles and tubes to insure salvage of undamaged materials.
- In-house machining capability to make tube sheets up to 52" diameter
- Torque controlled tube expanders to insure consistent and tight joints.
- Hydrostatically test all units before they leave our facility

- Do you have an **obsolete** heat exchanger which you are having trouble finding a replacement for?
- Do you have a heat exchanger, which has an **extended replacement lead-time**?
- Are you looking to **save money** on your Maintenance budget?
- Do you need to make **modifications** to your existing Heat Exchanger?

If you answered yes to any of these questions, then you need to speak to your representative for **HYDROTHRIFT CORPORATION**
